Dear Mr. Merks:

Thank you for your recent letter regarding ASTM activities in the area of geostatistics. I have asked Bob Morgan, Director of Technical Committee Operations to see that your concerns are addressed by the appropriate technical committee. It will be important for us to inform the volunteers involved with the geostatistics standards about the role Committee E11 can play in providing a technical review of their draft standards. This should be a useful step in making the document technically accurate.

Your interests in the voluntary standard system are appreciated.

Sincerely,

James A. Thomas
